SARP YACHT

We offer you style, high-tech quality and value at a fair price. Our yachts are built with meticulous attention to detail and respect for the great traditions of yacht building. A yacht for yachtsmen.

Sarp Yacht was founded in Antalya which is called the heaven of Turkey. We believe that beautiful things can be created most naturally in a beautiful atmosphere. Sarp Yacht belongs to the KANATLI Family who is also owner of ETI Group Companies. We have created one of the largest and most modern facilities in the Eastern Mediterranean, designed for the new-construction and refit of luxury yachts up to 88 m in length.

A team of designers, naval architects, project managers, engineers and craftsmen joined together with an enthusiastic workforce to start the first Project of 46-meter full displacement motor yacht. First 46 m is currently in build with delivery scheduled summer 2014.

Sarp Yacht has created a 10,000 m² facility in the Free Zone of Antalya in South Turkey. The shipyard has a hall that can accommodate new construction and refit projects up to 88 meters (290 feet) in length and 1,200 tons displacement.

Construction/Refit halls (115 m x 32 m x 16 m)

WORLD CLASS DESIGN

Complementing our in-house design team, Sarp Yacht works with the world's most renowned designers. More than ever before, the complexity of design, exotic materials and superior standards, stretch the boundaries of what can be built. Sarp Yacht is one of the very few yacht-builders able to cope and even excel with such a challenge.

We actively seek innovative and unusual projects and recent launches prove our ability to fuse luxury interior craftsmanship with complex exterior engineering.

Sarp Yacht is designed to have a timeless appeal. Creating an iconic yacht of which an owner can be proud of, is very much part of the design brief we launch.
